

Helping the world hear better

EXPERIENCE COUNTS

Okie E. Allen, BCHIS

REACH FOR THE FUTURE!

Every day new technology is being developed to help the hearing impaired.

Background noise is being addressed, along with separation of speech in group settings.

When someone speaks near you the voices may be spotted and recognized where that sound is coming from.

Even Tinnitus is being addressed with new types of maskers to make it less noticeable.

At Beltone, we are excited about new advances, yet at Beltone, we do not lose sight of the fact that we are dedicated to help the hearing impaired. We are part of a Health Care Professional System to provide the best service possible, and we are proud of it!

Please stop and visit us, ask about our most recent technologies. The Beltone **Reach** is one of those very impressive products!

Call 715-834-7111 or 866-291-7111 for your appointment.
